

STONEKS

Premium SPC & Natural Stone Solutions

PREMIUM NATURAL STONE COLLECTION

TRAVA / MARMA / TESSA / ROCCA / CORTE

Colour. Texture. Harmony.

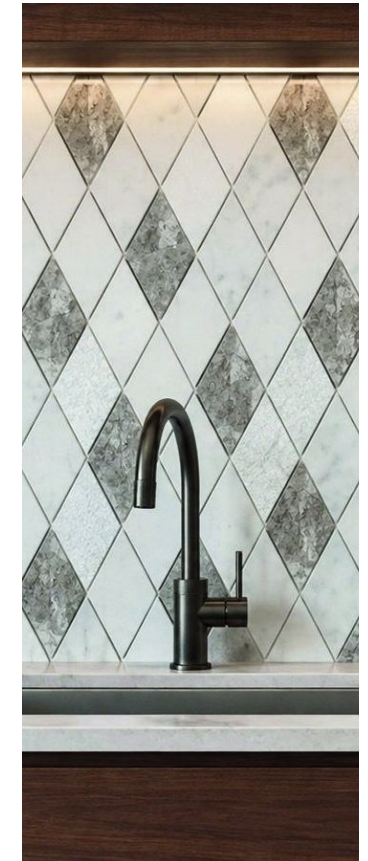

THE STONEKS SURFACE STORY

The same space. A natural continuation.

Floor, wall, and complementary details are considered together. STONEKS handles this unity through the material's color, texture, and its relationship with the space.

The unique traces of natural stone; the selection is not merely about a surface. It is a decision that establishes the character of the space.

Colour. Texture. Harmony.

COLLECTION GUIDE

One story. Five material worlds.

Discover your selection through material, texture and colour.

01

NATURAL STONE

TRAVA Travertine Collection	5
MARMA Marble Collection	11
TESSA Mosaic Collection	17
ROCCA Textured Wall Collection	39
CORTE Outdoor Stone Collection	53

Surface & Size Guide - Application & Care - Product Index - Samples & Quotations

NATURAL STONE

The authentic trace of nature.

Vein, pore, and tonal variations in travertine, marble, and other natural stone surfaces constitute the character of the material.

TRAVA / MARMA / TESSA / ROCCA / CORTE

WHY STONEKS?

The right material. A powerful space.

Aesthetic preference is completed with clear product information and a selection tailored to the project.

01

Surfaces with Character

Unique veins in natural stone; different pattern interpretations. Each material is presented with its own name and character.

03

Measured Variety

Modular stones, geometric mosaics, textured walls, and large formats. Choose the scale of the surface according to the proportions of your space.

02

Harmonised Tones

Light, neutral, warm, and dark color families. It makes it easier to consider the floor, wall, and complementary details in the same color language.

04

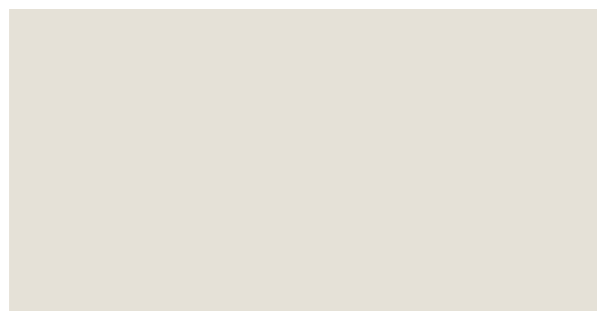

Decision Clarified by Sample

Evaluate color, surface, usage area, and order details together. Finalize the selection suitable for your project with a physical sample.

SHARED COLOR LANGUAGE

Four tonal families. A single unity.

A common guide explaining the color direction, alongside series and pattern names.

PALE

Light and Bright

White, ivory, and light tones. A spacious beginning that highlights the light.

MIST

Balanced and Calm

Silver, gray, and neutral transitions. A balance that makes room for other elements of the space.

SAND

Warm and Natural

Sand, cream, and earth effects. A warmth harmonious with natural materials.

DEEP

Bold and Defined

Dark grays and blacks. A distinct character for focal surfaces.

Tonal families aid in color selection; they do not alter the product's material, technical class, or area of use.

STONEKS

01

NATURAL STONE

TRAVA

The serene rhythm of nature.

Soft transitions, mineral traces, and warm tones. TRAVA brings the natural character of travertine to the entirety of the space. Each slab carries a different trace of the same story.

The final touch defining the texture.

The surface name is as important as the material. Evaluate your selection using a sample.

FILLED AND HONED

The natural voids of the travertine are filled; the surface is given a matte appearance through honing.

POLISHED

A surface appearance that reflects light. Glossiness does not imply a slip-resistance class or scratch resistance.

MATTE AND RUSTIC

A matte surface offers lower gloss. Rustic defines the visual and textural character of the surface.

TUMBLED

A process creating a softer, distressed effect on the edges and surface.

SPLIT FACE AND 3D

Relief surfaces that catch light at different angles. A shadow and depth effect on wall cladding.

BRUSHED / CHIPPED EDGE

Special finishes available in the source selection. Availability according to product, thickness, and dimension is evaluated separately.

A strong result starts with proper preparation.

01 Define the surface and application area.

Floor or wall; indoor or outdoor; dry or wet area. Stone type, surface, dimension, and load conditions are evaluated together.

02 Prepare the substrate.

Structural soundness, flatness, cleanliness, and moisture levels are checked. Necessary leveling and waterproofing are resolved within the application system.

03 Select the appropriate system for the material.

Adhesive, grout, movement joints, and necessary mechanical fixings are determined according to the material, size, substrate, and application location.

04 Perform pre-layout and sample approval.

Natural stones are mixed and laid out prior to installation. Vein direction, tonal distribution, mosaic alignment, and grout color are checked

Application conditions are evaluated alongside the product's technical data sheet and the instructions of the selected system.

SAMPLE / QUOTATION / ORDER

Let's clarify your selection.

Share the reference of the surface you like; let's evaluate it together for your project.

01

Surface Selection

Collection, catalog reference, color, and surface finish.

03

Sample and Technical Confirmation

Current sample; technical values, suitability for use, packaging, and availability.

02

Project Information

Application area, desired dimension, thickness, quantity, and delivery location.

04

Order Finalization

Approved selection, lead time, commercial terms, and delivery plan.

Catalog references define the visual records of this selection; they are not to be used in place of an inventory code. Samples presented under the same name may exhibit different vein or tonal distributions. Colors may vary on screens and in print; the order is finalized with a physical sample and current product information.

CORTE

8x8 / 8x16 / 16x16 / 16x24 / 8x24 inches
and French pattern set

1 inch = 25.4 mm. Nominal format, not a declaration of exact manufacturing dimension or tolerance. Precise width, length, thickness, caliber, and packaging information are specified in the quotation and product technical data sheet. Multi-format and pattern sets are not automatically assumed to be available in every color.

The first step, the right surface.
